PROFESSIONAL PROFILE

I love the entire process, from a well-written and organised backend code to a pleasing and intuitive design and layout in the frontend. In order to build incredible products, it is essential to understand how a system is working, which is the part of the process I enjoy the most.

There is always something new to learn in this field, which is an absolute blessing as it fits my curious personality very well. I am a big fan of Javascript with Typescript and enjoy using React. In the backend, Node and Express is what I know best, though I am definitely open to other languages and eager to learn and develop my knowledge.

EXPERIENCE

Formbound, Stockholm - *Frontend developer*

SEP 2021 - PRESENT

Formbound is a IT consulting company. Work tasks:

- Development of Omställningsfonden's "Mina Sidor" website with Next.js and Typescript.
- Creation, maintenance and refactoring of React components for Formbound's UI library.
- Migration of a Svelte code base to Next.js and Typescript.

Redmind, Stockholm - *Fullstack Developer intern*

JAN 2021 - JUN 2021

Redmind is a design and technology venture studio with a headquarter in Stockholm. Work tasks included:

Qolly - *Frontend*

JAN 2021 - FEB 2021

- Add Typescript to a React Native app
- Refactor code to make it reusable
- Fix bugs

Nemas - *Backend*

FEB 2021 - JUN 2021

- Develop modular web API with Node, Express and Typescript
- Curate and maintain documentation for the API using openapi specification
- Design database data structure in Cloud Firestore to optimise reads
- Implement authentication and validation middlewares with Firebase's Admin SDK and Joi
- Handle race conditions and batch writes
- Deployment of the dev API to App Engine and the client's website to Firebase Hosting
- Implement automatic individual and group mailing with Mailgun and Dynamic Links
- Implement push notifications with Firebase Cloud Messaging
